

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-6. (Cancelled).

7. (Currently Amended) A handheld device comprising:
a touch panel display, said touch panel display comprising a visible non-transparent conductive pattern adjacent to a visible adhesive dielectric spacer, wherein said visible non-transparent conductive pattern and said adhesive dielectric spacer have an approximately equal visual homogeneous appearance; and
a carrier frame, said carrier frame comprising at least one electrically conductive frame contact for establishing electrical contact with a-said touch panel display, said frame contact having an upper end and a lower end; wherein said upper end resides at least in part within the-a touch panel display mounting surface of said carrier frame and said lower end is electrically accessible by circuits resident within the confines of said carrier frame.

8. (Previously Presented) The handheld device of claim 7 wherein said carrier frame comprises a dielectric insert block.

Appl. No. 09/844,557
Amdt. Dated May 28, 2004
Reply to Office Action of March 29, 2004

9. (Currently Amended) The handheld device of claim 8 wherein said ~~carrier~~-frame contact comprises a metal.

10. (Currently Amended) The handheld device of claim 7 wherein said frame contact is press fit into said carrier frame.

11. (Previously Presented) The handheld device of claim 7 wherein said frame contact is molded into said carrier frame.

12. (Previously Presented) The handheld device of claim 7 comprising a plurality of frame contacts distributed over said touch panel display mounting surface.

13. (Previously Presented) A handheld device comprising a touch panel display, said touch panel display comprising a visible non-transparent conductive pattern adjacent to a visible adhesive dielectric spacer, wherein said visible non-transparent conductive pattern and said adhesive dielectric spacer have an approximately equal visual homogeneous appearance.

14. (Original) The handheld device of claim 13 further comprising a carrier frame, wherein an electrical contact to said touch panel display is established at the interface between the mounting surface of said carrier frame and said touch panel display.

Appl. No. 09/844,557
Amdt. Dated May 28, 2004
Reply to Office Action of March 29, 2004

15. (Original) The handheld device of claim 14 wherein said electrical contact to said touch panel display is established using an anisotropic conductive film.

16. (Original) The handheld device of claim 14 wherein said electrical contact to said touch panel display is established using an anisotropic conductive adhesive.

17. (Original) The handheld device of claim 15 wherein said carrier frame further comprises a protective rim.

18. (Original) The handheld device of claim 17 wherein said touch panel display is a near field imaging display.

19. (Original) The device of claim 15 wherein said touch panel display is a resistive touch panel display.

20. (Original) The device of claim 19 wherein said carrier frame further comprises a protective rim.
